

Quest CT400 Contactless Reader Retrofit

Anztec is pleased to announce the addition of a new retrofit kit to the product range. The CT400 Retrofit Kit allows a Quest CT400 contactless card reader to be added to an existing Anztec Quick Wash entry system.

A major feature of this kit is a totally new transaction processing module allowing an unparalleled level of connectivity and control. The Merlin 2 at the heart of this solution allows all configuration and management of the machine to be performed via the Anztec online interface over a local area network or the Internet.

- The kit includes a Quest CT400 card reader, Merlin 2 transaction processing module, cabinet blanking panels, all required cables and a software update for your existing machine.
- Provides an EMV compliant credit card solution.
- Allows setup and configuration to easily be performed online.
- Adds significant functionality with extended performance logs and time based pricing features.
- For QW-5956A and QW-5956B entry systems quote Anztec part number 50-000265.
